

JOINT SUPPORT

Osteoarthritis pain
& stiffness?
**Don't Suffer
Needlessly**

IMPROVE FLEXIBILITY

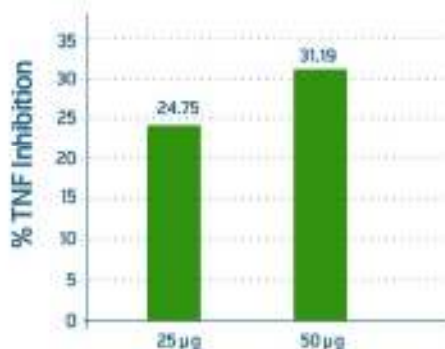

INCREASE MOBILITY

RELIEVE DISCOMFORT

Multiple nutraceutical and herbal ingredients in Mi LABS Joint Support work along synergistic pathways to decrease inflammation and promote the body's natural synthesis and maintenance of joints, ligaments, muscles and tendons. It protects, prevents and helps in the repair of musculoskeletal injuries and inflammation, regardless of the cause.

Effect of Mi LABS Joint Support against TNF alpha production

*report available upon request

Tumor necrosis factor-alpha (TNF-a) and nuclear factor are factors associated with chronic inflammatory conditions. These factors as well as another cytokines such as interleukin-1B (IL-1B) have been identified as factors that aid the destruction of cartilage in osteoarthritis and rheumatoid arthritis. Mi LABS Joint Support has shown anti-inflammatory properties and decreases TNF-a in a study conducted on RAW 264.7 (Mouse leukaemic monocyte macrophage cell line)
