

# SUGAR MANAGEMENT

Healthy glucose metabolism can make it easier to attain and maintain ideal weight. Avoiding after meal blood sugar spiking can also help protect your body from some of the consequences of elevated blood sugar such as vascular disease, including high blood pressure, strokes and heart attacks. Nerve damage, eye and kidney disease are also less frequent when blood sugar is stabilized.

Effect of Mi LABS Sugar formula on Glucose uptake activity in L-6 Myotubes

Mi LABS Sugar formula at 500 & 250 µg/ml concentration
